

I have received information that you are considering giving another type of FM station priority over the present stations. I would like to continue to be able to hear K-love on the radio. In my area, it is at 88.9 FM. Even though it is a national program, they also give local weather, and local community events. I love the station. There are no commercials, because it is listener supported (I am a supporter). It is positive, I don't have to worry that there might be expletives. They even play it at the beauty shop I go to! I think it has a calming effect on me. No one could have road rage while listening to K-love. That fact alone serves the public interest.
